Aeropostal Venezolana and Kr . Rodenburger Regional Operator of the K.L. L .

Our eyes glance off to the florals placed around the speaker's stand, where we see one from the KLM, the Aruba Bouw My., Eagle, Merchants Association, the "Nieuwe Eerste Nederlandse N.V.", "Maatschappy van Havenwerken, Mario Arends, Spritzer \& Fuhrmann, Viana Auto Supply, KNSM, and several others.

We are still wonderine where all these beautiful flowers come from, when there is a hush, and slowly the audience rises.

It is 11.30 and His Excellency, Governor L. Petors, accompanied by his wife, daughter and Adjutant have arrived.

In two more minutes, Ir. G. Schoorl, Director of the Public Works Department has taken his place at the speaker's stand In a fluent speech, Ir. Schoorl takes us back to 1935, when the first wooden shack belonging to the KLI/ was taken into use. He commemorated the inadequacy of this building and the pressing need for something better. Then came the second world war and with it the Americans. Plans wore made for a new building, and on June 5, 1942 the now building was taken in use Soon, also this proved too small. In $\mathrm{O}_{\mathrm{c}}-$ tober of 1945 an extension to this building was opened.
R. Schoorl went on to show how rapidIy air travel to this vital geographical point was increasing whtn the following yoar it was found that also this building, including the extension, was by no means large enough to accommodate the travelers efficiently. In 1946 new plans were drawn up for an adequate and modern terminal. On April 29, 1946, this work was put out to contract, but was a failure, inasmuch
as only one offer was made which was found to be machitoo high. Then, of courso there was the problem of procuring the $n$ necessary material. The venture was there fore postponed, until, on November 14,1947 an entirely new structure was put out to contract.

On January 2, 1948, the "Bouw Maatschap py Aruba" started with the construction of what is today the outstanding air terminal of the Caribbean.

In planning, designing and constructing a building such as this, said ilr. Schoorl, there are many persons and parties involved. A good policy is, therefore, to mention as few names as possible, because that minimizes the possibility of forgetting some. He couldn't however fail to mention the name of Ir. C.M. Bakker whose mental creation the structure was, and regretted very much that Mr. Bakker could not be there to witness the opening of his"brainchild".

He also mentioned the names of Wessrs. Loonstra and Nadel and after paying tribut to all of the men of the Public Works $D_{e}$ partment, without whose unstinting efforts and devotion it would not have been possi4 ble to complete this mamoth task, including the roadways and parking stall on time he concluded with a special word of appreciation and thanks for the work carried out by lir. Berghuis, Electro Technician, and his men for the installation of the hundreds of electrical conneotions, outlet switches and the wiring that will aid in making the structure a comfortable and highly safe and efficient stop for passengers.
M. Schoorl then asked H.E. Governor Peters to accept the building,

## THRILL-PACKED CARD SLATED

IN AID OF TEAM REPRESEITTNG ARUBA
In order to raise funds to finance the trip of our Amateurs to Grenada (see above a. fine boxing oard is in the making.

The date set for this event is Sunday April 2, 1950. For this special card, the prices have been drastically reduced to give all sports fans an opportunity to add their bit of support. The starting time has also been changed for this occasion.

The bouts will start at 6.30 PM., while the prices are set at Fis. 3 for resorved rinpside, Fls. 2 for rineside and F1. 1 for tribune.

In the main bout of the evening Rosend Perez will clash with Battling Siki in ah 8 -icounder. The semi final will feature Young Sharkey and Baby Atomic Bomber in a 6 -rounds contest. Other supporting 4rounders will match Young Quick Silver vs Young Sandy Saddler; Pepsi Cola Jr. vs. Curacao Terror (Buche) and Brown Sapa Pinto VS. an opponent to be named later.

In addition to the above tussles, Young Joe Loujs and Slipoing Tiger will ficht a 4-round exhibition. The kids selected to represent Aruba:will also appear in exhibitions.

With the prices set at Fls. 1, 2 \& 3. respectively, it leaves no. doubt that eves boxing, fan and sports lover will be preses at the Garden on this night to give our representatives thoir moral and financial support, and fans are urged to be early to avoid the big rush.

## BOXLRS SUPPORT AIATEURS

We. have been askpd to make special mention of the fact that all boxers appearing on the card on April $\&$ have agreed to (1) fight for reduced amounts and (2) donate $5 \%$ of the in purse in aid of the Amateur Team Fund.

This gesturg is highly appreciated by the Aruba Boxing Commission, the Iromotor, our publiontion and, we vare sure that wo are safe in saying . by the sports loving public of Aruba".

It is : even more appreciated when we 3 see Rosendo Perez as a stranger give the cause his wholehearted support, and expressine appreciation for the opportunity given our boys.

At the seme time, it fills us with utter discust to learn that a local boxer known as " "Lightning . Kid", when approached to appear on the card, not only demanded a price which could not possibly be met, but also refused to donate $5 \%$ of his purse for the cause.

Undoubtedly this news will be as shooking to his supporters 2 s it has been to us. However, confirmation will be found in the following letter by promotor Rombley.

## To all boxine fans:

I am very sorry to admit the refusal to cooperate of the boxer "Lightning Kid", but I cannot be blamod.

In oonnection with the forthcoming Amateur contest in Grenada, I deoided to stage a card in aid of this contest. I went around to our local boxers asking them for their cooperation - on the and of the coming month. All agreed, except Lightning Kid who bluntly refused to oooperate; one whom I personally thought would have been first to comply.

Governor Peters took the stand and after welcoming, His Excellency, Her Hajesty's envoy, the Messes. Short, Little john and Dr. Valdivieso in Dutch, English and Spanish respectively, he thanked all the guests for their presence.
H.E. then made the inaugural speech, a translation of which is printed on page 8 for the convenience of our readers.

After H.E. had. also unveiled the plaque, the National Anthem was played.

The guests were then given an opportuunity to inspect the building, after which they enjoyed the delicacies prepared by Ir. Bontekoe's staff, "washed" them down with the free drinks and viewed a flying. demonstration of the Aruba Flying Club while puffing away at the very best Dutch cigars and American cigarettes. Soon after His Excellency left, followed by small groups of guests until, at around 2 PM, very few were present, but all highly satisfied with what they had seen and hear on this; for Aruba, unforgetable day.

INAUGURAL SPLECH OF H.E. THE GOVERNOR
The Director of Fublic Fiorks, under whose direction this new station was constructed, häs just informed you of the history of the creation of this building, of this airport, I may, therefore, consider myself freed from the task of giving you a historical sketch of the air terminaf Dekota.

It is, however, useful to paise at the fact that this history is so short. The entire development of Arube from a peaceful, rural island to a rich, active and bustling industrial center, has token place in a short time.

The first regular air connection with irube dates back to mid 1934, then connected with Cursca0 by the Caribbean Airtrevel enterprise established on arubs. This concern maintained the connection with Curacao with a six passenger amphibian transport plano and signed a contract with the Government for mail transport. The enterprise had only \& short life and as carly as December, 1934, discontinued her flights.

In that same mont? the well-known "Snip of the KLM landed for the first time on dirubr and in January of 1935 the KLM started her first regular conneotion betwreen kruba and Curacao with two return flights a week.

In 1936 a regular air connection was opened with Marncaibo, in 1937 with Baranquilla and in Septomber 1943, in the midst of tho war, with Micmi.

When in 1942 the limerican Airforce started to uso the Dakota air field, it had to bo hardened and enlarged and since then it has increased in importance. Arube is at present a point of junation in the air services of the Caribbean area and wi this new structure and technical equipment iruba can compete with the very best air torminals around the Caribbean sea.

It therefore gives me pleasure to wish the irubans luck with this beeutiful and practical station. I am convinced that -through the efficient arrangement and the arigh the tristeful execution, the foundation is laid for an over incraasing air troffic via Aruba.

Mr. Schoorl has already praised the architeot, and the builder. I gledly join in on behalf of the Government.

Architect Bakker has won his' spurs in the Netherlands intilles; from his designs many graceful buildings have been erected on these islands and - if possibl

TOO GOOD TO BE TRUE :!

In a recent issue of the "Bours \& Nieuwsborichten" (Curacao Newspaper), we find an articlo dealine with Lago's Thrift Plan.

The writer slipped up in the article in stating that omployees may contribute from 3 to $10 \%$ of their carnings. This, as is known, should be from 2 to $10 \%$.

But this is not what "struck" us in the opistle. We almost fell overboard, howovar, when wo read thet the Lago is "oncournging thriftiness by adding $30 \%$ to their sevine: ${ }^{\text {" }}$.
